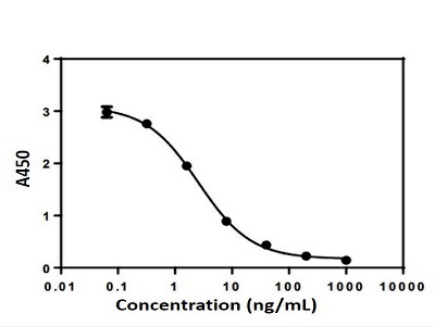
PEG ELISA Kit - Backbone Specific

Catalog # KA6892 Size 1 Kit

Applications



A representative standard curve with optical density readings at 450 nm on the Y axis against BSA-mPEG 20 kDa concentration on the X axis is shown below. Please note that the X-axis is a log10 scale.

Specification

Product Description	PEG ELISA Kit used an antibody that recognizes the polyoxyethylene backbone of PEG. Sensitivity v aries with PEG molecular weight.
Calibration Range	0 to 1000 ng/mL
Quality Control Testing	Standard curve A representative standard curve with optical density readings at 450 nm on the Y axis against BSA-mPEG 20 kDa concentration on the X axis is shown below. Please note that the X-axis is a log10 sc ale.
Storage Instruction	Store the kit at -20°C.

Applications

- Quantification
