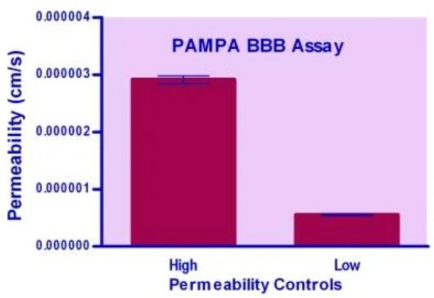
BBB Parallel Artificial Membrane Permeability Assay Kit

Catalog # KA7336 Size 1 Kit

Applications



Functional Study

Permeability Controls PAMPA using PBS, BBB membrane, and 18 hour incubation at 25°C

Specification

Product Description	BBB Parallel Artificial Membrane Permeability Assay Kit is a kit used for the quantitative determinati on of blood brain barrier (BBB) membrane permeability test compounds
Suitable Sample	Chemical compounds
Plate Format	96 Well
Storage Instruction	Store at -20°C. Aliquot to avoid repeated freezing and thawing.

Applications

- Functional Study

  Permeability Controls PAMPA using PBS, BBB membrane, and 18 hour incubation at 25°C
