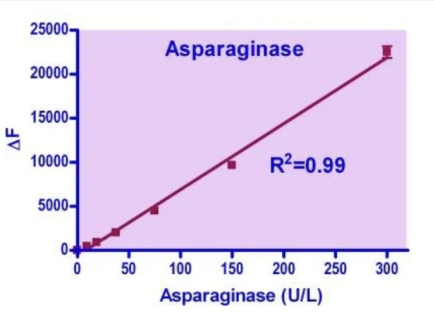
# Asparaginase Assay Kit

Catalog # KA7481 Size 1 Kit

## Applications



### Qualitative

Pipetting devices and accessories (e.g. multi-channel pipettor), black, flat-bottom 96-well plates (e.g. Corning Costar), centrifuge tubes and a plate reader. Varying amounts (300 U/L to 9.37 U/L) of highly purified E. coli. Asparaginase were assayed in the presence of 1 mM Asparagine for 20 minutes at RT.

## Specification

| | |
|---|---|
| **Product Description** | Asparaginase Assay Kit for quantitative determination of asparaginase activity in biological samples . |
| **Available Test** | 100 tests |
| **Detection Method** | FL 415/475 nm |
| **Limit of Detection** | 1.1 U/L |
| **Regulatory Status** | For research use only (RUO) |
| **Storage Instruction** | Store at -20°C. Avoid multiple freeze-thaw cycles. |

## Applications

- Qualitative

  Pipetting devices and accessories (e.g. multi-channel pipettor), black, flat-bottom 96-well plates (e.g. Corning Costar), centrifuge tubes and a plate reader. Varying amounts (300 U/L to 9.37 U/L) of highly purified E. coli. Asparaginase were assayed in the presence of 1 mM Asparagine for 20 minutes at RT.
