

ACSL5 (Human) IP-WB Antibody Pair

Catalog # : H00051703-PW1

規格 : [1 Set]

[List All](#)

Specification

Product Description: This IP-WB antibody pair set comes with one antibody for immunoprecipitation and another to detect the precipitated protein in western blot.

Reactivity: Human

Quality Control Testing: Immunoprecipitation-Western Blot (IP-WB)

Immunoprecipitation of ACSL5 transfected lysate using mouse monoclonal anti-ACSL5 and Protein A Magnetic Bead ([U0007](#)), and immunoblotted with rabbit polyclonal anti-ACSL5.

Supplied Product: Antibody pair set content:
1. Antibody pair for IP: mouse monoclonal anti-ACSL5 (300 ug)
2. Antibody pair for WB: rabbit polyclonal anti-ACSL5 (50 ul)

Storage Instruction: Store reagents of the antibody pair set at -20°C or lower. Please aliquot to avoid repeated freeze thaw cycle. Reagents should be returned to -20°C storage immediately after use.

Gene Name: ACSL5

Gene Alias: ACS2,ACS5,FACL5

Application Image

Immunoprecipitation-Western Blot

Gene acyl-CoA synthetase long-chain family member 5

Description:

Omim ID: [605677](#)

Gene Ontology: [Hyperlink](#)

Gene Summary: The protein encoded by this gene is an isozyme of the long-chain fatty-acid-coenzyme A ligase family. Although differing in substrate specificity, subcellular localization, and tissue distribution, all isozymes of this family convert free long-chain fatty acids into fatty acyl-CoA esters, and thereby play a key role in lipid biosynthesis and fatty acid degradation. This isozyme is highly expressed in uterus and spleen, and in trace amounts in normal brain, but has markedly increased levels in malignant gliomas. This gene functions in mediating fatty acid-induced glioma cell growth. Three transcript variants encoding two different isoforms have been found for this gene. [provided by RefSeq]
