MMP9 (Human) ELISA Kit

Catalog # KA7213 Size 1 Kit

Specification

Product Description	MMP9 (Human) ELISA Kit is a sandwich enzyme immunoassay for quantitative measurement of total MMP9.
Suitable Sample	Serum, Plasma
Sample Volume	5 uL
Intra-Assay	0.025
Inter-Assay	0.07000000000000001
Spiking Recovery	1.023
Calibration Range	0.625 to 20 ng/mL
Limit of Detection	0.16 ng/mL
Reactivity	Human
Regulation Status	For research use only (RUO)
Storage Instruction	Store at 4°C.

Applications

- Quantification

Gene Info — MMP9

Entrez GeneID	4318
Gene Name	MMP9

Copyright © 2023 Abnova Corporation. All Rights Reserved.

Gene Alias	CLG4B, GELB, MMP-9
Gene Description	matrix metallopeptidase 9 (gelatinase B, 92kDa gelatinase, 92kDa type IV collagenase)
Omim ID	120361
Gene Ontology	Hyperlink
Gene Summary	Proteins of the matrix metalloproteinase (MMP) family are involved in the breakdown of extracellular matrix in normal physiological processes, such as embryonic development, reproduction, and tissue remodeling, as well as in disease processes, such as arthritis and metastasis. Most MMP's are secreted as inactive proproteins which are activated when cleaved by extracellular proteinases. The enzyme encoded by this gene degrades type IV and V collagens. Studies in rhesus monkeys suggest that the enzyme is involved in IL-8-induced mobilization of hematopoietic progenitor cells from bone marrow, and murine studies suggest a role in tumor-associated tissue remodeling. [provided by RefSeq
Other Designations	92kD type IV collagenase|OTTHUMP00000031674|gelatinase B|macrophage gelatinase|matrix metalloproteinase 9|matrix metalloproteinase 9 (gelatinase B, 92kD gelatinase, 92kD type IV collagenase)|matrix metalloproteinase 9 (gelatinase B, 92kDa gelatinase, 92kD
