Murine RNase Inhibitor

Catalog # P11190 Size 2000 Units

Specification

Product Description	Murine RNase Inhibitor is a recombinant mouse-derived RNase inhibitor expressed and purified in E . coli.
Features	The enhanced antioxidant capacity means that does not form the disulfide bonds that human proteins produce under oxidative conditions. High purity soluble protein expression from E. coli, no RNase residue, compatible with RT-PCR/RT-q PCR systems.
Form	Liquid
Storage Instruction	Store at -20°C.

Applications

- In vitro Transcription
