Histone

Catalog # P5231 Size 250 mg

Specification

Product Description	Lyophilized. Dialyzed. Unfractionated mixture of histones.
Biological function	The histones are a group of water- and dilute acid-soluble basic proteins found associated with DNA in chromosomes. They are characterized by relatively high levels of lysine and arginine.
Host	Bovine
Form	Lyophilized
Preparation Method	Native protein purified from Calf Thymus
Storage Instruction	Store at 4°C.
Note	Histones are characterized by gel electrophoresis and solubility. Soluble in physiological saline, phos phate buffered saline (PBS) pH 7.1, or water when pH is adjusted to neutral.
