HuPro® Full-Length

GH1 (Human) Recombinant Protein

Catalog # P5906 Size 100 ug

Specification

Product Description	Human GH1 (NP_000506, 1 a.a. - 217 a.a.) full-length recombinant protein with C-terminal hexahistidine tag expressed HEK293EBNA1 cells.
Sequence	FPTIPLSRLFDNAMLRAHRLHQLAFDTYQEFEEAYIPKEQKYSFLQNPQTSLCFSESIPTPSNREETQQKSNLELLRISLLLIQSWLEPVQFLRSVFANSLVYGASDSNVYDLLKDLEEGIQTLMGRLEDGSPRTGQIFKQTYSKFDTNSHNDDALLKNYGLLYCFRKDMDKVETFLRIVQCRSVEGSCGFGSAAAHHHHHH
Host	Human
Theoretical MW (kDa)	23.1
Reactivity	Human
Form	Liquid
Preparation Method	Mammalian cell (HEK293EBNA1) expression system
Storage Buffer	In PBS without preservative
Storage Instruction	Store at -80°C. Aliquot to avoid repeated freezing and thawing.

Applications

- SDS-PAGE

Gene Info — GH1

Entrez GeneID	2688
GeneBank Accession#	NM_000515

Copyright © 2023 Abnova Corporation. All Rights Reserved.

Protein Accession#	NP_00050
Gene Name	GH1
Gene Alias	GH, GH-N, GHN, hGH-N
Gene Description	growth hormone 1
Omim ID	139250 173100 262400 262650 604271
Gene Ontology	Hyperlink
Gene Summary	The protein encoded by this gene is a member of the somatotropin/prolactin family of hormones w hich play an important role in growth control. The gene, along with four other related genes, is loca ted at the growth hormone locus on chromosome 17 where they are interspersed in the same tran scriptional orientation; an arrangement which is thought to have evolved by a series of gene duplic ations. The five genes share a remarkably high degree of sequence identity. Alternative splicing g enerates additional isoforms of each of the five growth hormones, leading to further diversity and potential for specialization. This particular family member is expressed in the pituitary but not in pl acental tissue as is the case for the other four genes in the growth hormone locus. Mutations in or deletions of the gene lead to growth hormone deficiency and short stature. [provided by RefSeq
Other Designations	pituitary growth hormone

Pathway

- Cytokine-cytokine receptor interaction
- Jak-STAT signaling pathway
- Neuroactive ligand-receptor interaction

Disease

- Adenocarcinoma
- Adenoma
- Alzheimer disease
- Birth Weight
- Brain Ischemia
- Breast cancer
- Breast Neoplasms
