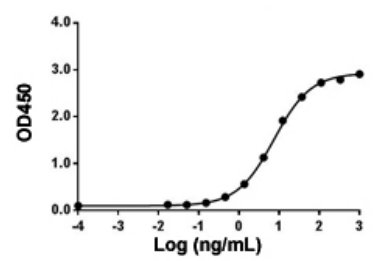
Anti-Ipilimumab recombinant monoclonal antibody, clone 26B6H7D9

Catalog # RAB09586 Size 40 ug

Applications



Enzyme-linked Immunoabsorbent Assay

Anti-Ipilimumab monoclonal antibody, clone 26B6H7D9 (Cat # RAB09586) binds with Ipilimumab, while the antibody does not recognize human IgG Fc fragment (data not shown). Coating antigen: Ipilimumab, 1 ug/mL. Anti-Ipilimumab monoclonal antibody, clone 26B6H7D9 (Cat # RAB09586) dilution start from 1000 ng/mL. EC_{50} =3.85 ng/mL.

Specification

Product Description	Recombinant mouse monoclonal antibody raised against Ipilimumab. Target gene is CTLA-4.
Immunogen	Ipilimumab.
Host	Mouse
Specificity	The product is specific for Ipilimumab. The antibody is recommended as a capture antibody in a pharmacokinetic (PK) bridging assay with detection antibody Anti-Ipilimumab recombinant monoclonal antibody, clone 4H6 (Biotin) (Cat # RAB09588).
Form	Lyophilized
Preparation Method	This antibody is produced from a hybridoma resulting from the fusion of partner and B-lymphocytes obtained from a mouse immunized with Ipilimumab.
Purification	Protein A purification
Isotype	IgG1

Copyright © 2023 Abnova Corporation. All Rights Reserved.

Recommend Usage	ELISA (ELISA detection: 0.01-0.1 ug/mL) (Direct/Indirect ELISA) The optimal working dilution should be determined by the end user.
Inhibitory IC50	Non-inhibitory
Storage Buffer	Lyophilized from PBS, pH 7.4 (0.02% sodium azide).
Storage Instruction	Store at -20°C. The lyophilized product remains stable up to 1 year at -20°C from date of receipt. After reconstitution with deionized water (or equivalent) to a final concentration of 0.5 mg/mL, it can b e stored for 2-3 weeks at 2-8°C or for up to 12 months at -20°C or below. Aliquot to avoid repeated freezing and thawing.
Note	This product contains sodium azide: a POISONOUS AND HAZARDOUS SUBSTANCE which shoul d be handled by trained staff only.

Applications

- Enzyme-linked Immunoabsorbent Assay

  Anti-Ipilimumab monoclonal antibody, clone 26B6H7D9 (Cat # RAB09586) binds with Ipilimumab, while the antibody does not recognize human IgG Fc fragment (data not shown). Coating antigen: Ipilimumab, 1 ug/mL. Anti-Ipilimumab monoclonal antibody, clone 26B6H7D9 (Cat # RAB09586) dilution start from 1000 ng/mL. EC_{50} =3.85 ng/mL.

Gene Info — CTLA4

Entrez GeneID	1493
Gene Name	CTLA4
Gene Alias	CD152, CELIAC3, CTLA-4, GSE, IDDM12
Gene Description	cytotoxic T-lymphocyte-associated protein 4
Omim ID	123890 140300 275000 601388 609755
Gene Ontology	Hyperlink
Gene Summary	This gene is a member of the immunoglobulin superfamily and encodes a protein which transmits an inhibitory signal to T cells. The protein contains a V domain, a transmembrane domain, and a c ytoplasmic tail. Alternate transcriptional splice variants, encoding different isoforms, have been ch aracterized. The membrane-bound isoform functions as a homodimer interconnected by a disulfid e bond, while the soluble isoform functions as a monomer. Mutations in this gene have been asso ciated with insulin-dependent diabetes mellitus, Graves disease, Hashimoto thyroiditis, celiac dis ease, systemic lupus erythematosus, thyroid-associated orbitopathy, and other autoimmune dise ases.
