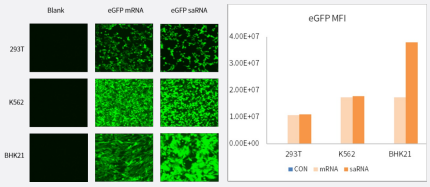
eGFP saRNA

Catalog # U0873 Size 100 ug

Applications



In vitro Transcription

eGFP saRNA successfully expressed 24 hours after transfection into cells. Fluorescence values detected by flow cytometry showed that the MFI (Mean Fluorescence Intensity) exceeded 1.0E7 in different cell types.

Specification

Product Description	eGFP saRNA is a self-amplifying RNA synthesized *in vitro*. The product is an enhanced green fluore scent protein can express strong green fluorescence.
Excitation/Emssion (nm)	488/509
Form	Liquid
Concentration	1 mg/mL
Recommend Usage	The optimal working dilution should be determined by the end user.
Storage Buffer	1 mM sodium citrate buffer
Storage Instruction	Store at -20°C. Aliquot to avoid repeated freezing and thawing.

Applications
