

# CDC45L & CDKN1A Protein Protein Interaction Antibody Pair

Catalog # DI0092 Size 1 Set

## Applications

Representative image of Proximity Ligation Assay of protein-protein interactions between CDC45L and CDKN1A. HeLa cells were stained with anti-CDC45L rabbit purified polyclonal antibody 1:1200 and anti-CDKN1A mouse monoclonal antibody 1:50. Each red dot represents the detection of protein-protein interaction complex. The images were analyzed using an optimized freeware (BlobFinder) download from The Centre for Image Analysis at Uppsala University.

## Specification

|                                |  |
|--------------------------------|--|
| <b>Product Description</b>     | This protein protein interaction antibody pair set comes with two antibodies to detect the protein-protein interaction, one against the CDC45L protein, and the other against the CDKN1A protein for use in <a href="#">in situ Proximity Ligation Assay</a> . <a href="#">See Publication Reference below</a> .   |
| <b>Reactivity</b>              | Human  |
| <b>Quality Control Testing</b> | Protein protein interaction immunofluorescence result.<br>Representative image of Proximity Ligation Assay of protein-protein interactions between CDC45L and CDKN1A. | <b>Supplied Product</b>        | Antibody pair set content:<br>1. CDC45L rabbit purified polyclonal antibody (100 ug)<br>2. CDKN1A mouse monoclonal antibody (40 ug)<br>*Reagents are sufficient for at least 30-50 assays using recommended protocols.   |
| <b>Storage Instruction</b>     | Store reagents of the antibody pair set at -20°C or lower. Please aliquot to avoid repeated freeze thaw cycle. Reagents should be returned to -20°C storage immediately after use.   |

## Applications

- *In situ* Proximity Ligation Assay (Cell)

## Gene Info — CDKN1A

|                    |   |
|--------------------|---|
| Entrez GenelD      | <a href="#">1026</a>  |
| Gene Name          | CDKN1A  |
| Gene Alias         | CAP20, CDKN1, CIP1, MDA-6, P21, SDI1, WAF1, p21CIP1   |
| Gene Description   | cyclin-dependent kinase inhibitor 1A (p21, Cip1)  |
| Omim ID            | <a href="#">116899</a>  |
| Gene Ontology      | <a href="#">Hyperlink</a>   |
| Gene Summary       | This gene encodes a potent cyclin-dependent kinase inhibitor. The encoded protein binds to and inhibits the activity of cyclin-CDK2 or -CDK4 complexes, and thus functions as a regulator of cell cycle progression at G1. The expression of this gene is tightly controlled by the tumor suppressor protein p53, through which this protein mediates the p53-dependent cell cycle G1 phase arrest in response to a variety of stress stimuli. This protein can interact with proliferating cell nuclear antigen (PCNA), a DNA polymerase accessory factor, and plays a regulatory role in S phase DNA replication and DNA damage repair. This protein was reported to be specifically cleaved by CASP3-like caspases, which thus leads to a dramatic activation of CDK2, and may be instrumental in the execution of apoptosis following caspase activation. Two alternatively spliced variants, which encode an identical protein, have been reported. [provided by RefSeq] |

**Gene Summary**

The protein encoded by this gene was identified by its strong similarity with *Saccharomyces cerevisiae* Cdc45, an essential protein required to the initiation of DNA replication. Cdc45 is a member of the highly conserved multiprotein complex including Cdc6/Cdc18, the minichromosome main tenance proteins (MCMs) and DNA polymerase, which is important for early steps of DNA replica tion in eukaryotes. This protein has been shown to interact with MCM7 and DNA polymerase alph a. Studies of the similar gene in *Xenopus* suggested that this protein play a pivotal role in the load ing of DNA polymerase alpha onto chromatin. Multiple polyadenylation sites of this gene are repor ted. [provided by RefSeq]
