

MMP1 & F2R Protein Protein Interaction Antibody Pair

Catalog # DI0176

Size 1 Set

Applications

Representative image of Proximity Ligation Assay of protein-protein interactions between MMP1 and F2R. HeLa cells were stained with anti-MMP1 rabbit purified polyclonal antibody 1:1200 and anti-F2R mouse monoclonal antibody 1:50. Each red dot represents the detection of protein-protein interaction complex. The images were analyzed using an optimized freeware (BlobFinder) download from The Centre for Image Analysis at Uppsala University.

Specification

Product Description

This protein protein interaction antibody pair set comes with two antibodies to detect the protein-protein interaction, one against the MMP1 protein, and the other against the F2R protein for use in [in situ Proximity Ligation Assay](#). [See Publication Reference below](#).

Reactivity

Human

Quality Control Testing

Protein protein interaction immunofluorescence result.
Representative image of Proximity Ligation Assay of protein-protein interactions between MMP1 and F2R. HeLa cells were stained with anti-MMP1 rabbit purified polyclonal antibody 1:1200 and anti-F2R mouse monoclonal antibody 1:50. Each red dot represents the detection of protein-protein interaction complex. The images were analyzed using an optimized freeware (BlobFinder) download from The Centre for Image Analysis at Uppsala University.

Supplied Product

Antibody pair set content:
1. MMP1 rabbit purified polyclonal antibody (100 ug)
2. F2R mouse monoclonal antibody (40 ug)
*Reagents are sufficient for at least 30-50 assays using recommended protocols.

Storage Instruction

Store reagents of the antibody pair set at -20°C or lower. Please aliquot to avoid repeated freeze-thaw cycle. Reagents should be returned to -20°C storage immediately after use.

Applications

- *In situ* Proximity Ligation Assay (Cell)

Gene Info — F2R

Entrez GeneID	2149
Gene Name	F2R
Gene Alias	CF2R, HTR, PAR1, TR
Gene Description	coagulation factor II (thrombin) receptor
Omim ID	187930
Gene Ontology	Hyperlink
Gene Summary	Coagulation factor II receptor is a 7-transmembrane receptor involved in the regulation of thrombotic response. Proteolytic cleavage leads to the activation of the receptor. F2R is a G-protein coupled receptor family member. [provided by RefSeq]
Other Designations	coagulation factor II receptor protease-activated receptor 1 thrombin receptor

Gene Info — MMP1

Entrez GeneID	4312
Gene Name	MMP1
Gene Alias	CLG, CLGN
Gene Description	matrix metalloproteinase 1 (interstitial collagenase)
Omim ID	120353 606963
Gene Ontology	Hyperlink
Gene Summary	Proteins of the matrix metalloproteinase (MMP) family are involved in the breakdown of extracellular matrix in normal physiological processes, such as embryonic development, reproduction, and tissue remodeling, as well as in disease processes, such as arthritis and metastasis. Most MMP's are secreted as inactive proproteins which are activated when cleaved by extracellular proteinases. This gene encodes a secreted enzyme which breaks down the interstitial collagens, types I, II, and III. The gene is part of a cluster of MMP genes which localize to chromosome 11q22.3. Alternative splicing results in multiple transcript variants.[provided by RefSeq]
Other Designations	fibroblast collagenase interstitial collagenase matrix metalloproteinase 1 matrix metalloproteinase 1 matrix metalloproteinase 1 (interstitial collagenase)
