

# TRAF2 & CDKN1B Protein Protein Interaction Antibody Pair

Catalog # DI0276      Size 1 Set

## Applications

Representative image of Proximity Ligation Assay of protein-protein interactions between TRAF2 and CDKN1B. HeLa cells were stained with anti-TRAF2 rabbit purified polyclonal antibody 1:1200 and anti-CDKN1B mouse monoclonal antibody 1:50. Each red dot represents the detection of protein-protein interaction complex. The images were analyzed using an optimized freeware (BlobFinder) download from The Centre for Image Analysis at Uppsala University.

## Specification

<b>Product Description</b>	This protein protein interaction antibody pair set comes with two antibodies to detect the protein-protein interaction, one against the TRAF2 protein, and the other against the CDKN1B protein for use in <i>in situ</i> Proximity Ligation Assay. <a href="#">See Publication Reference below.</a>
<b>Reactivity</b>	Human
<b>Quality Control Testing</b>	Protein protein interaction immunofluorescence result. Representative image of Proximity Ligation Assay of protein-protein interactions between TRAF2 and CDKN1B. HeLa cells were stained with anti-TRAF2 rabbit purified polyclonal antibody 1:1200 and anti-CDKN1B mouse monoclonal antibody 1:50. Each red dot represents the detection of protein-protein interaction complex. The images were analyzed using an optimized freeware (BlobFinder) download from The Centre for Image Analysis at Uppsala University.
<b>Supplied Product</b>	Antibody pair set content: 1. TRAF2 rabbit purified polyclonal antibody (100 ug) 2. CDKN1B mouse monoclonal antibody (40 ug) *Reagents are sufficient for at least 30-50 assays using recommended protocols.
<b>Storage Instruction</b>	Store reagents of the antibody pair set at -20°C or lower. Please aliquot to avoid repeated freeze-thaw cycle. Reagents should be returned to -20°C storage immediately after use.

## Applications

- *In situ* Proximity Ligation Assay (Cell)

## Gene Info — CDKN1B

**Entrez GeneID** [1027](#)

**Gene Name** CDKN1B

**Gene Alias** CDKN4, KIP1, MEN1B, MEN4, P27KIP1

**Gene Description** cyclin-dependent kinase inhibitor 1B (p27, Kip1)

**Omim ID** [600778 610755](#)

**Gene Ontology** [Hyperlink](#)

**Gene Summary** This gene encodes a cyclin-dependent kinase inhibitor, which shares a limited similarity with CDK inhibitor CDKN1A/p21. The encoded protein binds to and prevents the activation of cyclin E-CDK2 or cyclin D-CDK4 complexes, and thus controls the cell cycle progression at G1. The degradation of this protein, which is triggered by its CDK dependent phosphorylation and subsequent ubiquitination by SCF complexes, is required for the cellular transition from quiescence to the proliferative state. [provided by RefSeq]

**Other Designations** cyclin-dependent kinase inhibitor 1B

## Gene Info — TRAF2

**Entrez GeneID** [7186](#)

**Gene Name** TRAF2

**Gene Alias** MGC:45012, TRAP, TRAP3

**Gene Description** TNF receptor-associated factor 2

**Omim ID** [601895](#)

**Gene Ontology** [Hyperlink](#)

**Gene Summary**

The protein encoded by this gene is a member of the TNF receptor associated factor (TRAF) protein family. TRAF proteins associate with, and mediate the signal transduction from members of the TNF receptor superfamily. This protein directly interacts with TNF receptors, and forms a heterodimeric complex with TRAF1. This protein is required for TNF-alpha-mediated activation of MAPK8/JNK and NF-kappaB. The protein complex formed by this protein and TRAF1 interacts with the inhibitor-of-apoptosis proteins (IAPs), and functions as a mediator of the anti-apoptotic signals from TNF receptors. The interaction of this protein with TRADD, a TNF receptor associated apoptotic signal transducer, ensures the recruitment of IAPs for the direct inhibition of caspase activation. BIRC2/c-IAP1, an apoptosis inhibitor possessing ubiquitin ligase activity, can ubiquitinate and induce the degradation of this protein, and thus potentiate TNF-induced apoptosis. Multiple alternatively spliced transcript variants have been found for this gene, but the biological validity of only one transcript has been determined. [provided by RefSeq]
