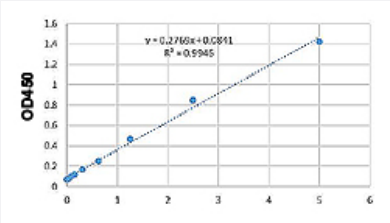
Anti-Nivolumab recombinant monoclonal antibody, clone 40F11 (Biotin)

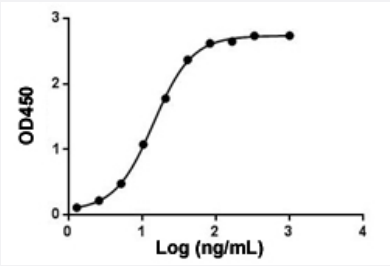
Catalog # RAB09609 Size 40 ug

Applications



Sandwich ELISA

Standard curve of Nivolumab Sandwich ELISA. The Nivolumab Sandwich ELISA assay is developed by using Anti-Nivolumab monoclonal antibody, clone 33H4 (Cat # MAB23098) and Anti-Nivolumab monoclonal antibody, clone 40F11 (Biotin) (Cat # RAB09609) as the capture and detection antibodies, respectively. The sensitivity of detecting Nivolumab is up to 78 pg/mL.



Enzyme-linked Immunoabsorbent Assay

ELISA binding of Anti-Nivolumab monoclonal antibody, clone 40F11 (Biotin) (Cat # RAB09609) with Nivolumab. While the antibody does not recognize the human IgG Fc fragment (data not shown). Coating antigen: Nivolumab, 1 ug/mL. Anti-Nivolumab monoclonal antibody, clone 40F11 (Biotin) (Cat # RAB09609) dilutions start from 1000 ng/mL. EC_{50} = 14.30 ng/mL.

Specification

Product Description	Recombinant rabbit monoclonal antibody raised against Nivolumab. Target gene is PD-1.
Immunogen	Nivolumab.
Host	Rabbit
Specificity	The antibody is recommended as a detection antibody in a pharmacokinetic (PK) bridging assay.
Form	Lyophilized

Copyright © 2023 Abnova Corporation. All Rights Reserved.

Conjugation	Biotin
Preparation Method	This antibody is produced from a hybridoma resulting from the fusion of partner and B-lymphocytes obtained from a rabbit immunized with Nivolumab.
Purification	Protein A purification
Isotype	IgG
Recommend Usage	ELISA (ELISA capture: 0.01-0.1 ug/mL) (Direct/Indirect ELISA) Sandwich ELISA The optimal working dilution should be determined by the end user.
Inhibitory IC50	N/A
Storage Buffer	Lyophilized from PBS, pH 7.4 (1% BSA, 0.02% sodium azide).
Storage Instruction	Store at -20°C on dry atmospher. The lyophilized product remains stable up to 1 year at -20°C from date of receipt. After reconstitution with deionized water (or equivalent) to a final concentration of 0.5 mg/mL, it can be stored for 2-3 weeks at 2-8°C or for up to 12 months at -20°C or below. Aliquot to avoid repeated freezing and thawing.
Note	This product contains sodium azide: a POISONOUS AND HAZARDOUS SUBSTANCE which should be handled by trained staff only.

Applications

- Sandwich ELISA

  Standard curve of Nivolumab Sandwich ELISA. The Nivolumab Sandwich ELISA assay is developed by using Anti-Nivolumab monoclonal antibody, clone 33H4 (Cat # MAB23098) and Anti-Nivolumab monoclonal antibody, clone 40F11 (Biotin) (Cat # RAB09609) as the capture and detection antibodies, respectively. The sensitivity of detecting Nivolumab is up to 78 pg/mL.

- Enzyme-linked Immunoabsorbent Assay

  ELISA binding of Anti-Nivolumab monoclonal antibody, clone 40F11 (Biotin) (Cat # RAB09609) with Nivolumab. While the antibody does not recognize the human IgG Fc fragment (data not shown). Coating antigen: Nivolumab, 1 ug/mL. Anti-Nivolumab monoclonal antibody, clone 40F11 (Biotin) (Cat # RAB09609) dilutions start from 1000 ng/mL. EC_{50} = 14.30 ng/mL.

Gene Info — PDCD1

Entrez GeneID	5133
Gene Name	PDCD1
Gene Alias	CD279, PD1, SLEB2, hPD-1, hPD-l

Gene Description	programmed cell death 1
Omim ID	152700 600244
Gene Ontology	Hyperlink
Gene Summary	This gene encodes a cell surface membrane protein of the immunoglobulin superfamily. This protein is expressed in pro-B-cells and is thought to play a role in their differentiation. In mice, expression of this gene is induced in the thymus when anti-CD3 antibodies are injected and large numbers of thymocytes undergo apoptosis. Mice deficient for this gene bred on a BALB/c background developed dilated cardiomyopathy and died from congestive heart failure. These studies suggest that this gene product may also be important in T cell function and contribute to the prevention of autoimmune diseases. [provided by RefSeq
