Gene Info — ASS1

Entrez GeneID	445
GeneBank Accession#	ASS1
Gene Name	ASS1
Gene Alias	ASS, CTLN1
Gene Description	argininosuccinate synthetase 1
Omim ID	215700 603470
Gene Ontology	Hyperlink
Gene Summary	The protein encoded by this gene catalyzes the penultimate step of the arginine biosynthetic pathway. There are approximately 10 to 14 copies of this gene including the pseudogenes scattered across the human genome, among which the one located on chromosome 9 appears to be the only functional gene for argininosuccinate synthetase. Mutations in the chromosome 9 copy of ASS cause citrullinemia. Two transcript variants encoding the same protein have been found for this gene . [provided by RefSeq]
