

# ATP6V1B2 monoclonal antibody (M02), clone M1

Catalog # H00000526-M02

Size 100 ug

## Applications

### Sandwich ELISA (Recombinant protein)

Detection limit for recombinant GST tagged ATP6V1B2 is approximately 0.03ng/ml as a capture antibody.

## Specification

### Product Description

Mouse monoclonal antibody raised against a full length recombinant ATP6V1B2.

### Immunogen

ATP6V1B2 (AAH03100, 1 a.a. ~ 511 a.a) full-length recombinant protein with GST tag. MW of the GST tag alone is 26 KDa.

### Host

Mouse

### Reactivity

Human

### Isotype

IgG2b Kappa

### Quality Control Testing

Antibody Reactive Against Recombinant Protein.

### Storage Buffer

In 1x PBS, pH 7.4

**Storage Instruction**

Store at -20°C or lower. Aliquot to avoid repeated freezing and thawing.

**Applications**

- Sandwich ELISA (Recombinant protein)

Detection limit for recombinant GST tagged ATP6V1B2 is approximately 0.03ng/ml as a capture antibody.

**Gene Summary** This gene encodes a component of vacuolar ATPase (V-ATPase), a multisubunit enzyme that mediates acidification of eukaryotic intracellular organelles. V-ATPase dependent organelle acidification is necessary for such intracellular processes as protein sorting, zymogen activation, receptor-mediated endocytosis, and synaptic vesicle proton gradient generation. V-ATPase is composed of a cytosolic V1 domain and a transmembrane V0 domain. The V1 domain consists of three A, three B, and two G subunits, as well as a C, D, E, F, and H subunit. The V1 domain contains the ATP catalytic site. The protein encoded by this gene is one of two V1 domain B subunit isoforms and is the only B isoform highly expressed in osteoclasts. [provided by RefSeq]
