

BNIP2 rabbit monoclonal antibody

Catalog # H00000663-K Size 100 ug x up to 3

Rabbit monoclonal antibody raised against a human BNIP2 peptide using ARM Technology.
A synthetic peptide of human BNIP2 is used for rabbit immunization. Customer or Abnova will decide on the preferred peptide sequence.
Rabbit
Non-fusion antibody library from rabbit spleen (<u>ARM Technology</u>).
Overexpression vector and transfection into 293H cell line.
Human
Protein A
lgG
Antibody reactive against human BNIP2 peptide by ELISA and mammalian transfected lysate by We stern Blot.
In 1x PBS, pH 7.4
Store at -20°C or lower. Aliquot to avoid repeated freezing and thawing.
Up to three rabbit lgG clones of 100 ug each will be delivered to customer.
1. Customer may provide cell or tissue lysate for antibody screening. 2. Rabbit monoclonal antibody generated by ARM technology is amenable to antibody engineering in cluding F(ab) ₂ , lgG, scFv and different Fc and non-Fc conjugates per customer request.

Applications

Western Blot (Transfected lysate)

Protocol Download

ELISA

Gene Info — BNIP2	
Entrez GenelD	<u>663</u>
GeneBank Accession#	BNIP2
Gene Name	BNIP2
Gene Alias	BNIP-2, NIP2
Gene Description	BCL2/adenovirus E1B 19kDa interacting protein 2
Omim ID	603292
Gene Ontology	<u>Hyperlink</u>
Gene Summary	This gene is a member of the BCL2/adenovirus E1B 19 kd-interacting protein (BNIP) family. Thou gh the specific function is unknown, it interacts with the E1B 19 kDa protein which is responsible f or the protection of virally-induced cell death, as well as E1B 19 kDa-like sequences of BCL2, als o an apoptotic protector. [provided by RefSeq
Other Designations	BCL2/adenovirus E1B 19kD interacting protein 2 BCL2/adenovirus E1B 19kD-interacting protein 2

Disease

- Genetic Predisposition to Disease
- Kidney Failure
- Narcolepsy
