Gene Name ZFP36L2

Gene Alias BRF2, ERF-2, ERF2, RNF162C, TIS11D

Gene Description zinc finger protein 36, C3H type-like 2

Gene Ontology [Hyperlink](#)

Gene Summary This gene is a member of the TIS11 family of early response genes. Family members are induced by various agonists such as the phorbol ester TPA and the polypeptide mitogen EGF. The encoded protein contains a distinguishing putative zinc finger domain with a repeating cys-his motif. This putative nuclear transcription factor most likely functions in regulating the response to growth factors. [provided by RefSeq]
