

# CD40 monoclonal antibody (M32), clone 5F2

Catalog # H00000958-M32

Size 100 ug

## Applications

Western Blot detection against Immunogen (23.43 KDa) .

## Specification

|                                      |                                                                                                                                                                                         |

- ELISA

## Gene Info — CD40

Entrez GeneID [958](#)

GeneBank Accession# [BC012419](#)

Protein Accession# [AAH12419](#)

Gene Name CD40

Gene Alias Bp50, CDW40, MGC9013, TNFRSF5, p50

Gene Description CD40 molecule, TNF receptor superfamily member 5

Omim ID [109535 606843](#)

Gene Ontology [Hyperlink](#)

**Gene Summary**

The protein encoded by this gene is a member of the TNF-receptor superfamily. This receptor has been found to be essential in mediating a broad variety of immune and inflammatory responses including T cell-dependent immunoglobulin class switching, memory B cell development, and germinal center formation. AT-hook transcription factor AKNA is reported to coordinately regulate the expression of this receptor and its ligand, which may be important for homotypic cell interactions. Adaptor protein TNFR2 interacts with this receptor and serves as a mediator of the signal transduction. The interaction of this receptor and its ligand is found to be necessary for amyloid-beta-induced microglial activation, and thus is thought to be an early event in Alzheimer disease pathogenesis. Two alternatively spliced transcript variants of this gene encoding distinct isoforms have been reported. [provided by RefSeq]
