Antibody

## CDKN2B DNAxPab

Catalog # H00001030-W01P      Size 200 ug

### Specification

|                         |                                                                                                                                                     |
|-------------------------|-----------------------------------------------------------------------------------------------------------------------------------------------------|
| Product Description     | Rabbit polyclonal antibody raised against a full-length human CDKN2B DNA using DNAx™ Immune technology.                                             |
| Technology              | <a href="#">DNAx™ Immune</a>                                                                                                                        |
| Immunogen               | Full-length human DNA                                                                                                                               |

| Host                    | Rabbit                                                                                                                                              |
| Reactivity              | Human                                                                                                                                               |
| Purification            | Protein A                                                                                                                                           |
| Quality Control Testing | Antibody reactive against mammalian transfected lysate.                                                                                             |
| Storage Buffer          | In 1x PBS, pH 7.4                                                                                                                                   |
| Storage Instruction     | Store at -20°C or lower. Aliquot to avoid repeated freezing and thawing.                                                                            |

### Applications

- Western Blot (Transfected lysate)  
[Protocol Download](#)
- Immunofluorescence (Transfected cell)
- Flow Cytometry (Transfected cell)

## Gene Info — CDKN2B

Entrez GeneID [1030](#)

GeneBank Accession# [NM\\_004936.3](#)

Protein Accession# [NP\\_004927.2](#)

Gene Name CDKN2B

Gene Alias CDK4I, INK4B, MTS2, P15, TP15, p15INK4b

Gene Description cyclin-dependent kinase inhibitor 2B (p15, inhibits CDK4)

Omim ID [600431](#)

Gene Ontology [Hyperlink](#)

**Gene Summary** This gene lies adjacent to the tumor suppressor gene CDKN2A in a region that is frequently mutated and deleted in a wide variety of tumors. This gene encodes a cyclin-dependent kinase inhibitor, which forms a complex with CDK4 or CDK6, and prevents the activation of the CDK kinases, thus the encoded protein functions as a cell growth regulator that controls cell cycle G1 progression. The expression of this gene was found to be dramatically induced by TGF beta, which suggested its role in the TGF beta induced growth inhibition. Two alternatively spliced transcript variants of this gene, which encode distinct proteins, have been reported. [provided by RefSeq]
