

CYP1A1 (Human) IP-WB Antibody Pair

Catalog # H00001543-PW1

Size 1 Set

Applications

Immunoprecipitation of CYP1A1 transfected lysate using rabbit polyclonal anti-CYP1A1 and Protein A Magnetic Bead ([U0007](#)), and immunoblotted with mouse purified polyclonal anti-CYP1A1.

Specification

Product Description	This IP-WB antibody pair set comes with one antibody for immunoprecipitation and another to detect the precipitated protein in western blot.
Reactivity	Human
Interspecies Antigen Sequence	Mouse (80%); Rat (79%)
Quality Control Testing	Immunoprecipitation-Western Blot (IP-WB) Immunoprecipitation of CYP1A1 transfected lysate using rabbit polyclonal anti-CYP1A1 and Protein A Magnetic Bead (U0007), and immunoblotted with mouse purified polyclonal anti-CYP1A1.
Supplied Product	Antibody pair set content: 1. Antibody pair for IP: rabbit polyclonal anti-CYP1A1 (300 ul) 2. Antibody pair for WB: mouse purified polyclonal anti-CYP1A1 (50 ug)
Storage Instruction	Store reagents of the antibody pair set at -20°C or lower. Please aliquot to avoid repeated freeze thaw cycle. Reagents should be returned to -20°C storage immediately after use.

Applications

- Immunoprecipitation-Western Blot

Gene Info — CYP1A1

Entrez GeneID [1543](#)

Gene Name CYP1A1

Gene Alias AHH, AHRR, CP11, CYP1, P1-450, P450-C, P450DX

Gene Description cytochrome P450, family 1, subfamily A, polypeptide 1

Omim ID [108330](#)

Gene Ontology [Hyperlink](#)

Gene Summary This gene, CYP1A1, encodes a member of the cytochrome P450 superfamily of enzymes. The cytochrome P450 proteins are monooxygenases which catalyze many reactions involved in drug metabolism and synthesis of cholesterol, steroids and other lipids. This protein localizes to the endoplasmic reticulum and its expression is induced by some polycyclic aromatic hydrocarbons (PAHs), some of which are found in cigarette smoke. The enzyme's endogenous substrate is unknown; however, it is able to metabolize some PAHs to carcinogenic intermediates. The gene has been associated with lung cancer risk. A related family member, CYP1A2, is located approximately 25 kb away from CYP1A1 on chromosome 15. [provided by RefSeq]

Other Designations aryl hydrocarbon hydroxylase|cytochrome P1-450, dioxin-inducible|cytochrome P450 1A1|cytochrome P450, subfamily I (aromatic compound-inducible), polypeptide 1|flavoprotein-linked monooxygenase|xenobiotic monooxygenase
