

ELK1 rabbit monoclonal antibody

Catalog # H00002002-K Size 100 ug x up to 3

Specification

Product Description	Rabbit monoclonal antibody raised against a human ELK1 peptide using ARM Technology.
Immunogen	A synthetic peptide of human ELK1 is used for rabbit immunization. Customer or Abnova will decide on the preferred peptide sequence.
Host	Rabbit
Library Construction	Non-fusion antibody library from rabbit spleen (ARM Technology).
Expression	Overexpression vector and transfection into 293H cell line.
Reactivity	Human
Purification	Protein A
Isotype	IgG
Quality Control Testing	Antibody reactive against human ELK1 peptide by ELISA and mammalian transfected lysate by Western Blot.
Storage Buffer	In 1x PBS, pH 7.4
Storage Instruction	Store at -20°C or lower. Aliquot to avoid repeated freezing and thawing.
Deliverable	Up to three rabbit IgG clones of 100 ug each will be delivered to customer.
Note	1. Customer may provide cell or tissue lysate for antibody screening. 2. Rabbit monoclonal antibody generated by ARM technology is amenable to antibody engineering including F(ab) ₂ , IgG, scFv and different Fc and non-Fc conjugates per customer request.

Applications

- Western Blot (Transfected lysate)

[Protocol Download](#)

- ELISA

Gene Info — ELK1

Entrez GeneID	2002
GeneBank Accession#	ELK1
Gene Name	ELK1
Gene Alias	-
Gene Description	ELK1, member of ETS oncogene family
Omim ID	311040
Gene Ontology	Hyperlink
Gene Summary	This gene is a member of the Ets family of transcription factors and of the ternary complex factor (TCF) subfamily. Proteins of the TCF subfamily form a ternary complex by binding to the the serum response factor and the serum reponse element in the promoter of the c-fos proto-oncogene. The protein encoded by this gene is a nuclear target for the ras-raf-MAPK signaling cascade. Alternately spliced transcript variants encoding the same protein have been found for this gene. [provided by RefSeq]
Other Designations	ELK1 protein OTTHUMP00000023224 OTTHUMP00000023225
