

GP1BA polyclonal antibody (A01)

Catalog # H00002811-A01

Size 50 uL

Applications

Western Blot detection against Immunogen (38.21 KDa) .

Specification

Product Description	Mouse polyclonal antibody raised against a partial recombinant GP1BA.
Immunogen	GP1BA (AAH27955, 19 a.a. ~ 128 a.a) partial recombinant protein with GST tag.
Sequence	ICEVSKVASHLEVNC DKRNL TALPPDL PKD TTILH LSENLLYTFSLATLMPYTRLTQLNLDRCETKL QVDGTL PVLGTLDSLHNQLQSLPLL GQTLPALTVLDVPFNRL
Host	Mouse
Reactivity	Human
Quality Control Testing	Antibody Reactive Against Recombinant Protein. Western Blot detection against Immunogen (38.21 KDa) .
Storage Buffer	50 % glycerol
Storage Instruction	Store at -20°C or lower. Aliquot to avoid repeated freezing and thawing.

Applications

- Western Blot (Recombinant protein)

Gene Name GP1BA

Gene Alias BSS, CD42B, CD42b-alpha, GP1B, MGC34595

Gene Description glycoprotein Ib (platelet), alpha polypeptide

Omim ID [177820 231200 258660 606672](#)

Gene Ontology [Hyperlink](#)

Gene Summary Glycoprotein Ib (GP Ib) is a platelet surface membrane glycoprotein composed of a heterodimer, an alpha chain and a beta chain, that are linked by disulfide bonds. The Gp Ib functions as a receptor for von Willebrand factor (VWF). The complete receptor complex includes noncovalent association of the alpha and beta subunits with platelet glycoprotein IX and platelet glycoprotein V. The binding of the GP Ib-IX-V complex to VWF facilitates initial platelet adhesion to vascular subendothelium after vascular injury, and also initiates signaling events within the platelet that lead to enhanced platelet activation, thrombosis, and hemostasis. This gene encodes the alpha subunit. Several polymorphisms and mutations have been described in this gene, some of which are the cause of Bernard-Soulier syndromes and platelet-type von Willebrand disease. [provided by RefSeq]

Other Designations platelet glycoprotein Ib alpha polypeptide|platelet membrane glycoprotein 1b-alpha subunit
