

IFNGR1 (Human) IP-WB Antibody Pair

Catalog # H00003459-PW1

Size 1 Set

Applications

Immunoprecipitation of IFNGR1 transfected lysate using rabbit polyclonal anti-IFNGR1 and Protein A Magnetic Bead ([U0007](#)), and immunoblotted with mouse polyclonal anti-IFNGR1.

Specification

Product Description	This IP-WB antibody pair set comes with one antibody for immunoprecipitation and another to detect the precipitated protein in western blot.
Reactivity	Human
Quality Control Testing	Immunoprecipitation-Western Blot (IP-WB) Immunoprecipitation of IFNGR1 transfected lysate using rabbit polyclonal anti-IFNGR1 and Protein A Magnetic Bead (U0007), and immunoblotted with mouse polyclonal anti-IFNGR1.
Supplied Product	Antibody pair set content: 1. Antibody pair for IP: rabbit polyclonal anti-IFNGR1 (300 ul) 2. Antibody pair for WB: mouse polyclonal anti-IFNGR1 (50 ul)
Storage Instruction	Store reagents of the antibody pair set at -20°C or lower. Please aliquot to avoid repeated freeze thaw cycle. Reagents should be returned to -20°C storage immediately after use.

Applications

- Immunoprecipitation-Western Blot

Gene Info — IFNGR1

Entrez GeneID	3459
Gene Name	IFNGR1
Gene Alias	CD119, FLJ45734, IFNGR
Gene Description	interferon gamma receptor 1
Omim ID	107470 209950 600263 607948
Gene Ontology	Hyperlink
Gene Summary	This gene (IFNGR1) encodes the ligand-binding chain (alpha) of the gamma interferon receptor. Human interferon-gamma receptor is a heterodimer of IFNGR1 and IFNGR2. A genetic variation in IFNGR1 is associated with susceptibility to Helicobacter pylori infection. In addition, defects in IFNGR1 are a cause of mendelian susceptibility to mycobacterial disease, also known as familial disseminated atypical mycobacterial infection. [provided by RefSeq]
Other Designations	AVP, type 2 CD119 antigen OTTHUMP00000017285 antiviral protein, type 2 immune interferon receptor 1 interferon-gamma receptor alpha chain
