

MaxPab®

IL1A purified MaxPab rabbit polyclonal antibody (D01P)

Catalog # H00003552-D01P

Size 100 ug

Applications

Western Blot (Transfected lysate)

Western Blot analysis of IL1A expression in transfected 293T cell line ([H00003552-T01](#)) by IL1A MaxPab polyclonal antibody.

Lane 1: IL1A transfected lysate(30.60 KDa).

Lane 2: Non-transfected lysate.

In situ Proximity Ligation Assay (Cell)

Proximity Ligation Analysis of protein-protein interactions between IL1A and IL1R2. HeLa cells were stained with anti-IL1A rabbit purified polyclonal 1:1200 and anti-IL1R2 mouse monoclonal antibody 1:50. Each red dot represents the detection of protein-protein interaction complex, and nuclei were counterstained with DAPI (blue).

Gene Summary

The protein encoded by this gene is a member of the interleukin 1 cytokine family. This cytokine is a pleiotropic cytokine involved in various immune responses, inflammatory processes, and hematopoiesis. This cytokine is produced by monocytes and macrophages as a proprotein, which is proteolytically processed and released in response to cell injury, and thus induces apoptosis. This gene and eight other interleukin 1 family genes form a cytokine gene cluster on chromosome 2. It has been suggested that the polymorphism of these genes is associated with rheumatoid arthritis and Alzheimer's disease. [provided by RefSeq]
