

IL6R (Human) Matched Antibody Pair

Catalog # H00003570-AP41

Size 1 Set

Applications

Sandwich ELISA detection sensitivity ranging from 1 ng/ml to 100 ng/ml.

Specification

Product Description	This antibody pair set comes with a matched antibody pair to detect and quantify the protein level of human IL6R.
Reactivity	Human
Quality Control Testing	Standard curve using recombinant protein (H00003570-Q01) as an analyte. Sandwich ELISA detection sensitivity ranging from 1 ng/ml to 100 ng/ml.
Supplied Product	Antibody pair set content: 1. Capture antibody: mouse monoclonal anti-IL6R (100 ug) 2. Detection antibody: biotinylated mouse monoclonal anti-IL6R, IgG1 Kappa (50 ug) *Reagents are sufficient for at least 3-5 x 96 well plates using recommended protocols.
Storage Instruction	Store reagents of the antibody pair set at -20°C or lower. Please aliquot to avoid repeated freeze thaw cycle. Reagents should be returned to -20°C storage immediately after use.

Applications

- ELISA Pair (Recombinant protein)

Gene Info — IL6R

Entrez GeneID [3570](#)

Gene Name IL6R

Gene Alias CD126, IL-6R-1, IL-6R-alpha, IL6RA, MGC104991

Gene Description interleukin 6 receptor

Omim ID [147880](#)

Gene Ontology [Hyperlink](#)

Gene Summary

Interleukin 6 (IL6) is a potent pleiotropic cytokine that regulates cell growth and differentiation and plays an important role in immune response. The protein encoded by this gene is a subunit of the receptor complex for IL6. The IL6 receptor is a protein complex consisting of this protein and interleukin 6 signal transducer (IL6ST/GP130/IL6-beta), a receptor subunit also shared by many other cytokines. Dysregulated production of IL6 and this receptor are implicated in the pathogenesis of many diseases, such as multiple myeloma, autoimmune diseases and prostate cancer. Alternatively spliced transcript variants encoding distinct isoforms have been reported. [provided by RefSeq]

Other Designations CD126 antigen|OTTHUMP00000034320|interleukin 6 receptor alpha subunit
