

DNAXPAb

Hard-to-Find
Antibody

IL12B DNAXPab

Catalog # H00003593-W01P

Size 100 ug

Applications

Western Blot (Transfected lysate)

Western Blot analysis of IL12B expression in transfected 293T cell line by IL12B DNAXPab polyclonal antibody.

Lane 1: IL12B transfected lysate(54.78 KDa).

Lane 2: Non-transfected lysate.

Specification

Product Description

Rabbit polyclonal antibody raised against a full-length human IL12B DNA using DNAX™ Immune technology.

Technology

[DNAX™ Immune](#)

Immunogen

IL12B (AAH67498.1, 23 a.a. ~ 328 a.a) full-length human DNA

Host

Rabbit

Reactivity

Human

Purification

Protein A

Quality Control Testing

Antibody reactive against mammalian transfected lysate.

Storage Buffer

In 1x PBS, pH 7.4

Storage Instruction

Store at -20°C or lower. Aliquot to avoid repeated freezing and thawing.

Applications

- Western Blot (Transfected lysate)

Western Blot analysis of IL12B expression in transfected 293T cell line by IL12B DNAPab polyclonal antibody.

Lane 1: IL12B transfected lysate(54.78 KDa).

Lane 2: Non-transfected lysate.

Gene Summary

This gene encodes a subunit of interleukin 12, a cytokine that acts on T and natural killer cells, and has a broad array of biological activities. Interleukin 12 is a disulfide-linked heterodimer composed of the 40 kD cytokine receptor like subunit encoded by this gene, and a 35 kD subunit encoded by IL12A. This cytokine is expressed by activated macrophages that serve as an essential inducer of Th1 cells development. This cytokine has been found to be important for sustaining a sufficient number of memory/effector Th1 cells to mediate long-term protection to an intracellular pathogen. Overexpression of this gene was observed in the central nervous system of patients with multiple sclerosis (MS), suggesting a role of this cytokine in the pathogenesis of the disease. The promoter polymorphism of this gene has been reported to be associated with the severity of atopic and non-atopic asthma in children. [provided by RefSeq]
