

# IL13 (Human) Matched Antibody Pair

Catalog # H00003596-AP42      Size 1 Set

## Applications

Sandwich ELISA detection sensitivity ranging from 3 ng/ml to 100 ng/ml.

## Specification

|                                |                                                                                                                                                                                                                                                                          |
|--------------------------------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>Product Description</b>     | This antibody pair set comes with a matched antibody pair to detect and quantify the protein level of human IL13.                                                                                                                                                        |
| <b>Reactivity</b>              | Human                                                                                                                                                                                                                                                                    |
| <b>Quality Control Testing</b> | Standard curve using recombinant protein ( H00003596-P01 ) as an analyte.<br>Sandwich ELISA detection sensitivity ranging from 3 ng/ml to 100 ng/ml.                                                                                                                     |
| <b>Supplied Product</b>        | Antibody pair set content:<br>1. Capture antibody: mouse monoclonal anti-IL13 (100 ug)<br>2. Detection antibody: biotinylated mouse monoclonal anti-IL13, IgG2a Kappa (50 ug)<br>*Reagents are sufficient for at least 3-5 x 96 well plates using recommended protocols. |
| <b>Storage Instruction</b>     | Store reagents of the antibody pair set at -20°C or lower. Please aliquot to avoid repeated freeze thaw cycle. Reagents should be returned to -20°C storage immediately after use.                                                                                       |

## Applications

- ELISA Pair (Recombinant protein)

## Gene Info — IL13

Entrez GeneID [3596](#)

Gene Name IL13

Gene Alias ALRH, BHR1, IL-13, MGC116786, MGC116788, MGC116789, P600

Gene Description interleukin 13

Omim ID [147683 600807 607154](#)

Gene Ontology [Hyperlink](#)

**Gene Summary** This gene encodes an immunoregulatory cytokine produced primarily by activated Th2 cells. This cytokine is involved in several stages of B-cell maturation and differentiation. It up-regulates CD23 and MHC class II expression, and promotes IgE isotype switching of B cells. This cytokine down-regulates macrophage activity, thereby inhibits the production of pro-inflammatory cytokines and chemokines. This cytokine is found to be critical to the pathogenesis of allergen-induced asthma but operates through mechanisms independent of IgE and eosinophils. This gene, IL3, IL5, IL4, and CSF2 form a cytokine gene cluster on chromosome 5q, with this gene particularly close to IL4. [provided by RefSeq]
