Gene Name ITGA2

Gene Alias BR, CD49B, GPIa, VLA-2, VLAA2

Gene Description integrin, alpha 2 (CD49B, alpha 2 subunit of VLA-2 receptor)

Omim ID [192974](#)

Gene Ontology [Hyperlink](#)

Gene Summary This gene product belongs to the integrin alpha chain family. Integrins are heterodimeric integral membrane glycoproteins composed of a distinct alpha chain and a common beta chain. They are found on a wide variety of cell types including, T cells, fibroblasts and platelets. Integrins are involved in cell adhesion and also participate in cell-surface mediated signalling.
