Entrez GeneID	4188
GeneBank Accession#	NM_005586
Protein Accession#	NP_005577
Gene Name	MDFI
Gene Alias	I-MF, I-mfa
Gene Description	MyoD family inhibitor
Omim ID	604971
Gene Ontology	Hyperlink
Gene Summary	This protein is a transcription factor that negatively regulates other myogenic family proteins. Studies of the mouse homolog, I-mf, show that it interferes with myogenic factor function by masking nuclear localization signals and preventing DNA binding. Knockout mouse studies show defects in the formation of vertebrae and ribs that also involve cartilage formation in these structures. [provided by RefSeq
