

OGG1 (Human) IP-WB Antibody Pair

Catalog # H00004968-PW1

Size 1 Set

Applications

Immunoprecipitation of OGG1 transfected lysate using rabbit polyclonal anti-OGG1 and Protein A Magnetic Bead ([U0007](#)), and immunoblotted with mouse polyclonal anti-OGG1.

Specification

Product Description	This IP-WB antibody pair set comes with one antibody for immunoprecipitation and another to detect the precipitated protein in western blot.
Reactivity	Human
Quality Control Testing	Immunoprecipitation-Western Blot (IP-WB) Immunoprecipitation of OGG1 transfected lysate using rabbit polyclonal anti-OGG1 and Protein A Magnetic Bead (U0007), and immunoblotted with mouse polyclonal anti-OGG1.
Supplied Product	Antibody pair set content: 1. Antibody pair for IP: rabbit polyclonal anti-OGG1 (300 ul) 2. Antibody pair for WB: mouse polyclonal anti-OGG1 (50 ul)
Storage Instruction	Store reagents of the antibody pair set at -20°C or lower. Please aliquot to avoid repeated freeze thaw cycle. Reagents should be returned to -20°C storage immediately after use.

Applications

- Immunoprecipitation-Western Blot

Gene Info — OGG1

Entrez GeneID [4968](#)

Gene Name OGG1

Gene Alias HMMH, HOGG1, MUTM, OGH1

Gene Description 8-oxoguanine DNA glycosylase

Omim ID [144700 601982](#)

Gene Ontology [Hyperlink](#)

Gene Summary This gene encodes the enzyme responsible for the excision of 8-oxoguanine, a mutagenic base byproduct which occurs as a result of exposure to reactive oxygen. The action of this enzyme includes lyase activity for chain cleavage. Alternative splicing of the C-terminal region of this gene classifies splice variants into two major groups, type 1 and type 2, depending on the last exon of the sequence. Type 1 alternative splice variants end with exon 7 and type 2 end with exon 8. All variants share the N-terminal region in common, which contains a mitochondrial targeting signal that is essential for mitochondrial localization. Many alternative splice variants for this gene have been described, but the full-length nature for every variant has not been determined. [provided by RefSeq]

Other Designations 8-hydroxyguanine DNA glycosylase|OTTHUMP00000122619
