

RXRA (Human) IP-WB Antibody Pair

Catalog # H00006256-PW1

Size 1 Set

Applications

Immunoprecipitation of RXRA transfected lysate using mouse monoclonal anti-RXRA and Protein A Magnetic Bead ([U0007](#)), and immunoblotted with rabbit polyclonal anti-RXRA.

Specification

Product Description	This IP-WB antibody pair set comes with one antibody for immunoprecipitation and another to detect the precipitated protein in western blot.
Reactivity	Human
Quality Control Testing	Immunoprecipitation-Western Blot (IP-WB) Immunoprecipitation of RXRA transfected lysate using mouse monoclonal anti-RXRA and Protein A Magnetic Bead (U0007), and immunoblotted with rabbit polyclonal anti-RXRA.
Supplied Product	Antibody pair set content: 1. Antibody pair for IP: mouse monoclonal anti-RXRA (300 ug) 2. Antibody pair for WB: rabbit polyclonal anti-RXRA (50 ul)
Storage Instruction	Store reagents of the antibody pair set at -20°C or lower. Please aliquot to avoid repeated freeze thaw cycle. Reagents should be returned to -20°C storage immediately after use.

Applications

- Immunoprecipitation-Western Blot

Gene Info — RXRA

Entrez GeneID [6256](#)

Gene Name RXRA

Gene Alias FLJ00280, FLJ00318, FLJ16020, FLJ16733, MGC102720, NR2B1

Gene Description retinoid X receptor, alpha

Omim ID [180245](#)

Gene Ontology [Hyperlink](#)

Gene Summary Retinoid X receptors (RXRs) and retinoic acid receptors (RARs), are nuclear receptors that mediate the biological effects of retinoids by their involvement in retinoic acid-mediated gene activation. These receptors exert their action by binding, as homodimers or heterodimers, to specific sequences in the promoters of target genes and regulating their transcription. The protein encoded by this gene is a member of the steroid and thyroid hormone receptor superfamily of transcriptional regulators. [provided by RefSeq]
