

Proteoliposomes

Full-Length

SELE (Human) Recombinant Protein

Catalog # H00006401-G01

Size 10 ug

Specification

Product Description

Human SELE full-length ORF (NP_000441.1) recombinant protein without tag.
This product is belong to Proteoliposome (PL).

Host

Wheat Germ (in vitro)

Theoretical MW (kDa)

66.7

Form

Liquid

Preparation Method

[in vitro wheat germ expression system with proprietary liposome technology](#)

Purification

None

Recommend Usage

Heating may cause protein aggregation. Please do not heat this product before electrophoresis.

Storage Buffer

25 mM Tris-HCl of pH8.0 containing 2% glycerol.

Storage Instruction

Store at -80°C. Aliquot to avoid repeated freezing and thawing.

Note

Best use within three months from the date of receipt of this protein.

Applications

- Antibody Production

Gene Info — SELE

Entrez GeneID	6401
GeneBank Accession#	NM_000450.1
Protein Accession#	NP_000441.1
Gene Name	SELE
Gene Alias	CD62E, ELAM, ELAM1, ESEL, LECAM2
Gene Description	selectin E
Omim ID	131210 145500 161950
Gene Ontology	Hyperlink
Gene Summary	The protein encoded by this gene is found in cytokine-stimulated endothelial cells and is thought to be responsible for the accumulation of blood leukocytes at sites of inflammation by mediating the adhesion of cells to the vascular lining. It exhibits structural features such as the presence of lectin- and EGF-like domains followed by short consensus repeat (SCR) domains that contain 6 conserved cysteine residues. These proteins are part of the selectin family of cell adhesion molecules. Adhesion molecules participate in the interaction between leukocytes and the endothelium and appear to be involved in the pathogenesis of atherosclerosis. [provided by RefSeq]
Other Designations	OTTHUMP00000032745 endothelial adhesion molecule 1 leukocyte endothelial cell adhesion molecule 2
