Entrez GeneID [6876](#)**Gene Name** TAGLN**Gene Alias** DKFZp686P11128, SM22, SMCC, TAGLN1, WS3-10**Gene Description** transgelin**Omim ID** [600818](#)**Gene Ontology** [Hyperlink](#)

Gene Summary The protein encoded by this gene is a transformation and shape-change sensitive actin cross-linking/gelling protein found in fibroblasts and smooth muscle. Its expression is down-regulated in many cell lines, and this down-regulation may be an early and sensitive marker for the onset of transformation. A functional role of this protein is unclear. Two transcript variants encoding the same protein have been found for this gene. [provided by RefSeq]

Other Designations SM22-alpha|transgelin variant 2
