

TAP1 monoclonal antibody (M02), clone 1B11

Catalog # H00006890-M02

Size 100 ug

Applications

Sandwich ELISA (Recombinant protein)

Detection limit for recombinant GST tagged TAP1 is approximately 1ng/ml as a capture antibody.

Western Blot detection against Immunogen (37.73 KDa) .

Specification

Product Description

Mouse monoclonal antibody raised against a partial recombinant TAP1.

Immunogen

TAP1 (AAH14081, 241 a.a. ~ 350 a.a) partial recombinant protein with GST tag. MW of the GST tag alone is 26 KDa.

Sequence

GSETRRLSLFLVLVVLSSLGEMAIFFFTGRLTDWILQDGSADTFTRNLTMSILTIAVLEFVGDGI
YNNTMGHVHSHLQGEVFGAVLRQETEFFQQNQGTGNIMSRVTE

Host

Mouse

Reactivity

Human

Isotype

IgG3 Kappa

Quality Control Testing

Antibody Reactive Against Recombinant Protein.
Western Blot detection against Immunogen (37.73 KDa) .

Storage Buffer

In 1x PBS, pH 7.4

Storage Instruction

Store at -20°C or lower. Aliquot to avoid repeated freezing and thawing.

Applications

- Western Blot (Recombinant protein)

Gene Summary

The membrane-associated protein encoded by this gene is a member of the superfamily of ATP-binding cassette (ABC) transporters. ABC proteins transport various molecules across extra- and intra-cellular membranes. ABC genes are divided into seven distinct subfamilies (ABC1, MDR/TAP, MRP, ALD, OABP, GCN20, White). This protein is a member of the MDR/TAP subfamily. Members of the MDR/TAP subfamily are involved in multidrug resistance. The protein encoded by this gene is involved in the pumping of degraded cytosolic peptides across the endoplasmic reticulum into the membrane-bound compartment where class I molecules assemble. Mutations in this gene may be associated with ankylosing spondylitis, insulin-dependent diabetes mellitus, and celiac disease. [provided by RefSeq]
