

Proteoliposomes

Full-Length

TLR2 (Human) Recombinant Protein

Catalog # H00007097-G01

Size 10 ug

Specification

Product Description

Human TLR2 full-length ORF (NP_003255.2) recombinant protein without tag.
This product is belong to Proteoliposome (PL).

Host

Wheat Germ (in vitro)

Theoretical MW (kDa)

89.8

Interspecies Antigen Sequence

Mouse (71); Rat (72)

Form

Liquid

Preparation Method

[in vitro wheat germ expression system with proprietary liposome technology](#)

Purification

None

Recommend Usage

Heating may cause protein aggregation. Please do not heat this product before electrophoresis.

Storage Buffer

25 mM Tris-HCl of pH8.0 containing 2% glycerol.

Storage Instruction

Store at -80°C. Aliquot to avoid repeated freezing and thawing.

Note

Best use within three months from the date of receipt of this protein.

Applications

- [Antibody Production](#)

Gene Info — TLR2

Entrez GeneID	7097
GeneBank Accession#	NM_003264.3
Protein Accession#	NP_003255.2
Gene Name	TLR2
Gene Alias	CD282, TIL4
Gene Description	toll-like receptor 2
Omim ID	114500 246300 603028
Gene Ontology	Hyperlink
Gene Summary	The protein encoded by this gene is a member of the Toll-like receptor (TLR) family which plays a fundamental role in pathogen recognition and activation of innate immunity. TLRs are highly conserved from Drosophila to humans and share structural and functional similarities. They recognize pathogen-associated molecular patterns (PAMPs) that are expressed on infectious agents, and mediate the production of cytokines necessary for the development of effective immunity. The various TLRs exhibit different patterns of expression. This gene is expressed most abundantly in peripheral blood leukocytes, and mediates host response to Gram-positive bacteria and yeast via stimulation of NF-kappaB. [provided by RefSeq]
Other Designations	toll/interleukin 1 receptor-like 4
