

VASP rabbit monoclonal antibody

Catalog # H00007408-K Size 100 ug x up to 3

Specification	
Product Description	Rabbit monoclonal antibody raised against a human VASP peptide using ARM Technology.
Immunogen	A synthetic peptide of human VASP is used for rabbit immunization. Customer or Abnova will decide on the preferred peptide sequence.
Host	Rabbit
Library Construction	Non-fusion antibody library from rabbit spleen (<u>ARM Technology</u>).
Expression	Overexpression vector and transfection into 293H cell line.
Reactivity	Human
Purification	Protein A
Isotype	lgG
Quality Control Testing	Antibody reactive against human VASP peptide by ELISA and mammalian transfected lysate by We stern Blot.
Storage Buffer	In 1x PBS, pH 7.4
Storage Instruction	Store at -20°C or lower. Aliquot to avoid repeated freezing and thawing.
Deliverable	Up to three rabbit lgG clones of 100 ug each will be delivered to customer.
Note	 Customer may provide cell or tissue lysate for antibody screening. Rabbit monoclonal antibody generated by ARM technology is amenable to antibody engineering in cluding F(ab)₂, lgG, scFv and different Fc and non-Fc conjugates per customer request.

Applications

Western Blot (Transfected lysate)

Protocol Download

ELISA

Gene Info — VASP	
Entrez GenelD	7408
GeneBank Accession#	VASP
Gene Name	VASP
Gene Alias	-
Gene Description	vasodilator-stimulated phosphoprotein
Omim ID	601703
Gene Ontology	<u>Hyperlink</u>
Gene Summary	Vasodilator-stimulated phosphoprotein (VASP) is a member of the Ena-VASP protein family. En a-VASP family members contain an EHV1 N-terminal domain that binds proteins containing E/D FPPPXD/E motifs and targets Ena-VASP proteins to focal adhesions. In the mid-region of the p rotein, family members have a proline-rich domain that binds SH3 and WW domain-containing pr oteins. Their C-terminal EVH2 domain mediates tetramerization and binds both G and F actin. V ASP is associated with filamentous actin formation and likely plays a widespread role in cell adhe sion and motility. VASP may also be involved in the intracellular signaling pathways that regulate i ntegrin-extracellular matrix interactions. VASP is regulated by the cyclic nucleotide-dependent kin ases PKA and PKG.
