

MaxPab®

# VDR purified MaxPab mouse polyclonal antibody (B01P)

Catalog # H00007421-B01P

Size 50 ug

## Applications

### Western Blot (Cell lysate)

VDR MaxPab polyclonal antibody. Western Blot analysis of VDR expression in 293.

### Western Blot (Transfected lysate)

Western Blot analysis of VDR expression in transfected 293T cell line ([H00007421-T01](#)) by VDR MaxPab polyclonal antibody.

Lane 1: VDR transfected lysate(46.97 KDa).

Lane 2: Non-transfected lysate.

### Immunofluorescence

Immunofluorescence of purified MaxPab antibody to VDR on HeLa cell. [antibody concentration 10 ug/ml]

## Specification

### Product Description

Mouse polyclonal antibody raised against a full-length human VDR protein.

|                         |                                                                                                                                                                                                                                                                                                                                                                                                                                                                |

| Gene Summary       | This gene encodes the nuclear hormone receptor for vitamin D3. This receptor also functions as a receptor for the secondary bile acid lithocholic acid. The receptor belongs to the family of trans-acting transcriptional regulatory factors and shows sequence similarity to the steroid and thyroid hormone receptors. Downstream targets of this nuclear hormone receptor are principally involved in mineral metabolism though the receptor regulates a variety of other metabolic pathways, such as those involved in the immune response and cancer. Mutations in this gene are associated with type II vitamin D-resistant rickets. A single nucleotide polymorphism in the initiation codon results in an alternate translation start site three codons downstream. Alternative splicing results in multiple transcript variants encoding the same protein. [provided by RefSeq] |
| Other Designations | vitamin D (1,25-dihydroxyvitamin D3) receptor                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                             |
