

# VIM monoclonal antibody (M13), clone 4D10

Catalog # H00007431-M13

Size 100 ug

## Applications

Western Blot detection against Immunogen.

## Specification

**Product Description** Mouse monoclonal antibody raised against human VIM.

**Immunogen** A synthetic peptide corresponding to human VIM

**Sequence** RQDV DNASLARLDLERKVES

**Host** Mouse

**Reactivity** Human

**Interspecies Antigen Sequence** Mouse (100); Rat (100)

**Isotype** IgG1 Kappa

**Quality Control Testing** Antibody Reactive Against Recombinant Protein.  
Western Blot detection against Immunogen.

**Storage Buffer** In 1x PBS, pH 7.4

**Storage Instruction** Store at -20°C or lower. Aliquot to avoid repeated freezing and thawing.

## Applications

- Western Blot (Recombinant protein)

- ELISA

## Gene Info — VIM

Entrez GeneID [7431](#)

GeneBank Accession# [NM\\_003380.5](#)

Protein Accession# [NP\\_003371.2](#)

Gene Name VIM

Gene Alias FLJ36605

Gene Description vimentin

Omim ID [193060](#)

Gene Ontology [Hyperlink](#)

**Gene Summary** This gene encodes a member of the intermediate filament family. Intermediate filamentents, along with microtubules and actin microfilaments, make up the cytoskeleton. The protein encoded by thi s gene is responsible for maintaining cell shape, integrity of the cytoplasm, and stabilizing cytoske letal interactions. It is also involved in the immune response, and controls the transport of low-dens ity lipoprotein (LDL)-derived cholesterol from a lysosome to the site of esterification. It functions a s an organizer of a number of critical proteins involved in attachment, migration, and cell signaling. Mutations in this gene causes a dominant, pulverulent cataract

**Other Designations** OTTHUMP00000019224
