

PTTG1 monoclonal antibody (M23), clone 3H8

Catalog # H00009232-M23

Size 100 ug

Specification

Product Description Mouse monoclonal antibody raised against a full-length recombinant PTTG1.

Immunogen PTTG1 (NP_004210, 93 a.a. ~ 113 a.a) synthetic peptide.

Sequence CKTVKAKSSVPASD

Host Mouse

Reactivity Human

Interspecies Antigen Sequence Mouse (71); Rat (71)

Isotype IgG2a Kappa

Quality Control Testing Antibody Reactive Against Recombinant Protein.

Storage Buffer In 1x PBS, pH 7.4

Storage Instruction Store at -20°C or lower. Aliquot to avoid repeated freezing and thawing.

Applications

- ELISA

Gene Info — PTTG1

Entrez GeneID [9232](#)

GeneBank Accession# [NM_004219](#)

Protein Accession# [NP_004210](#)

Gene Name	PTTG1
Gene Alias	EAP1, HPTTG, MGC126883, MGC138276, PTTG, TUTR1
Gene Description	pituitary tumor-transforming 1
Omim ID	604147
Gene Ontology	Hyperlink
Gene Summary	The encoded protein is a homolog of yeast securin proteins, which prevent separins from promoting sister chromatid separation. It is an anaphase-promoting complex (APC) substrate that associates with a separin until activation of the APC. The gene product has transforming activity in vitro and tumorigenic activity in vivo, and the gene is highly expressed in various tumors. The gene product contains 2 PXXP motifs, which are required for its transforming and tumorigenic activities, as well as for its stimulation of basic fibroblast growth factor expression. It also contains a destruction box (D box) that is required for its degradation by the APC. The acidic C-terminal region of the encoded protein can act as a transactivation domain. The gene product is mainly a cytosolic protein, although it partially localizes in the nucleus. [provided by RefSeq]
Other Designations	ESP1-associated protein 1 OTTHUMP00000160845 pituitary tumor-transforming protein 1 securin tumor-transforming protein 1
