

# KIAA0020 (Human) IP-WB Antibody Pair

Catalog # H00009933-PW1

Size 1 Set

## Applications

Immunoprecipitation of KIAA0020 transfected lysate using rabbit polyclonal anti-KIAA0020 and Protein A Magnetic Bead ([U0007](#)), and immunoblotted with mouse polyclonal anti-KIAA0020.

## Specification

|                                |                                                                                                                                                                                                                                                    |
|--------------------------------|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>Product Description</b>     | This IP-WB antibody pair set comes with one antibody for immunoprecipitation and another to detect the precipitated protein in western blot.                                                                                                       |
| <b>Reactivity</b>              | Human                                                                                                                                                                                                                                              |
| <b>Quality Control Testing</b> | Immunoprecipitation-Western Blot (IP-WB)<br>Immunoprecipitation of KIAA0020 transfected lysate using rabbit polyclonal anti-KIAA0020 and Protein A Magnetic Bead ( <a href="#">U0007</a> ), and immunoblotted with mouse polyclonal anti-KIAA0020. |
| <b>Supplied Product</b>        | Antibody pair set content:<br>1. Antibody pair for IP: rabbit polyclonal anti-KIAA0020 (300 ul)<br>2. Antibody pair for WB: mouse polyclonal anti-KIAA0020 (50 ul)                                                                                 |
| <b>Storage Instruction</b>     | Store reagents of the antibody pair set at -20°C or lower. Please aliquot to avoid repeated freeze thaw cycle. Reagents should be returned to -20°C storage immediately after use.                                                                 |

## Applications

- Immunoprecipitation-Western Blot
