Gene Name SCAMP3

Gene Alias C1orf3

Gene Description secretory carrier membrane protein 3

Omim ID [606913](#)

Gene Ontology [Hyperlink](#)

Gene Summary This gene product belongs to the SCAMP family of proteins which are secretory carrier membrane proteins. They function as carriers to the cell surface in post-golgi recycling pathways. Different family members are highly related products of distinct genes, and are usually expressed together. These findings suggest that the SCAMPs may function at the same site during vesicular transport rather than in separate pathways. Two transcript variants encoding different isoforms have been found for this gene. [provided by RefSeq]
