

MAEA (Human) Recombinant Protein (Q01)

Catalog # H00010296-Q01 Size 25 ug, 10 ug

Applications

Specification	
Product Description	Human MAEA partial ORF (NP_001017405.1, 292 a.a 396 a.a.) recombinant protein with GST-ta g at N-terminal.
Sequence	AGLSAIKTPQCYKEDGSSKSPDCPVCSRSLNKLAQPLPMAHCANSRLVCKISGDVMNENNPPM MLPNGYVYGYNSLLSIRQDDKVVCPRTKEVFHFSQAEKVYIM
Host	Wheat Germ (in vitro)
Theoretical MW (kDa)	37.29
Interspecies Antigen Sequence	Mouse (98); Rat (98)
Preparation Method	in vitro wheat germ expression system
Purification	Glutathione Sepharose 4 Fast Flow
Quality Control Testing	12.5% SDS-PAGE Stained with Coomassie Blue.
Storage Buffer	50 mM Tris-HCI, 10 mM reduced Glutathione, pH=8.0 in the elution buffer.
Storage Instruction	Store at -80°C. Aliquot to avoid repeated freezing and thawing.
Note	Best use within three months from the date of receipt of this protein.

Applications

- Enzyme-linked Immunoabsorbent Assay
- Western Blot (Recombinant protein)
- Antibody Production
- Protein Array

Gene Info — MAEA	
Entrez GenelD	<u>10296</u>
GeneBank Accession#	<u>NM_001017405</u>
Protein Accession#	<u>NP_001017405.1</u>
Gene Name	MAEA
Gene Alias	EMLP, EMP, HLC-10, PIG5
Gene Description	macrophage erythroblast attacher
Gene Ontology	Hyperlink
Gene Summary	This gene product mediates the attachment of erythroblasts to macrophages. This attachment pro motes terminal maturation and enucleation of erythroblasts, presumably by suppressing apoptosi s. This protein is an integral membrane protein with the N-terminus on the extracellular side and th e C-terminus on the cytoplasmic side of the cell. Two immunologically related isoforms of erythrob last macrophage protein with apparent molecular weights of 33 kD and 36 kD were detected in m acrophage membranes; this gene encodes the larger isoform. Multiple alternatively spliced transc ript variants encoding distinct isoforms have been found for this gene, but the biological validity of some variants has not been determined. [provided by RefSeq
Other Designations	erythroblast macrophage protein lung cancer-related protein 10 proliferation-inducing gene 5
