

FBXL11 rabbit monoclonal antibody

Catalog # H00022992-K Size 100 ug x up to 3

Specification

Product Description	Rabbit monoclonal antibody raised against a human FBXL11 peptide using ARM Technology.
Immunogen	A synthetic peptide of human FBXL11 is used for rabbit immunization. Customer or Abnova will decide on the preferred peptide sequence.
Host	Rabbit
Library Construction	Non-fusion antibody library from rabbit spleen (ARM Technology).
Expression	Overexpression vector and transfection into 293H cell line.
Reactivity	Human
Purification	Protein A
Isotype	IgG
Quality Control Testing	Antibody reactive against human FBXL11 peptide by ELISA and mammalian transfected lysate by Western Blot.
Storage Buffer	In 1x PBS, pH 7.4
Storage Instruction	Store at -20°C or lower. Aliquot to avoid repeated freezing and thawing.
Deliverable	Up to three rabbit IgG clones of 100 ug each will be delivered to customer.
Note	1. Customer may provide cell or tissue lysate for antibody screening. 2. Rabbit monoclonal antibody generated by ARM technology is amenable to antibody engineering including F(ab) ₂ , IgG, scFv and different Fc and non-Fc conjugates per customer request.

Applications

- Western Blot (Transfected lysate)

[Protocol Download](#)

- ELISA

Gene Info — FBXL11

Entrez GeneID	22992
GeneBank Accession#	FBXL11
Gene Name	FBXL11
Gene Alias	CXXC8, DKFZp434M1735, FBL11, FBL7, FLJ00115, FLJ46431, JHDM1A, KDM2A, KIAA1004, LILINA
Gene Description	F-box and leucine-rich repeat protein 11
Omim ID	605657
Gene Ontology	Hyperlink
Gene Summary	<p>This gene encodes a member of the F-box protein family which is characterized by an approximately 40 amino acid motif, the F-box. The F-box proteins constitute one of the four subunits of ubiquitin protein ligase complex called SCFs (SKP1-cullin-F-box), which function in phosphorylation-dependent ubiquitination. The F-box proteins are divided into 3 classes: Fbws containing WD-40 domains, Fbls containing leucine-rich repeats, and Fbxs containing either different protein-protein interaction modules or no recognizable motifs. The protein encoded by this gene belongs to the Fbls class and, in addition to an F-box, contains at least 6 highly degenerated leucine-rich repeats. Alternative splicing results in multiple transcript variants. [provided by RefSeq]</p>
Other Designations	F-box protein FBL11 jumonji C domain-containing histone demethylase 1A
