

DNAxPAb

Hard-to-Find
Antibody

FBXL11 DNAxPab

Catalog # H00022992-W01P

Size 200 ug

Specification

Product Description Rabbit polyclonal antibody raised against a full-length human FBXL11 DNA using DNAx™ Immune technology.

Technology [DNAx™ Immune](#)

Immunogen Full-length human DNA

Host Rabbit

Reactivity Human

Purification Protein A

Quality Control Testing Antibody reactive against mammalian transfected lysate.

Storage Buffer In 1x PBS, pH 7.4

Storage Instruction Store at -20°C or lower. Aliquot to avoid repeated freezing and thawing.

Applications

- Western Blot (Transfected lysate)

[Protocol Download](#)

- Immunofluorescence (Transfected cell)

- Flow Cytometry (Transfected cell)

Gene Name FBXL11

Gene Alias CXXC8, DKFZp434M1735, FBL11, FBL7, FLJ00115, FLJ46431, JHDM1A, KDM2A, KIAA1004, LILINA

Gene Description F-box and leucine-rich repeat protein 11

Omim ID [605657](#)

Gene Ontology [Hyperlink](#)

Gene Summary This gene encodes a member of the F-box protein family which is characterized by an approximately 40 amino acid motif, the F-box. The F-box proteins constitute one of the four subunits of ubiquitin protein ligase complex called SCFs (SKP1-cullin-F-box), which function in phosphorylation-dependent ubiquitination. The F-box proteins are divided into 3 classes: Fbws containing WD-40 domains, Fbls containing leucine-rich repeats, and Fbxs containing either different protein-protein interaction modules or no recognizable motifs. The protein encoded by this gene belongs to the Fbls class and, in addition to an F-box, contains at least 6 highly degenerated leucine-rich repeats. Alternative splicing results in multiple transcript variants. [provided by RefSeq]

Other Designations F-box protein FBL11|jumonji C domain-containing histone demethylase 1A
