

BLNK rabbit monoclonal antibody

Catalog # H00029760-K Size 100 ug x up to 3

Specification	
Product Description	Rabbit monoclonal antibody raised against a human BLNK peptide using ARM Technology.
Immunogen	A synthetic peptide of human BLNK is used for rabbit immunization. Customer or Abnova will decide on the preferred peptide sequence.
Host	Rabbit
Library Construction	Non-fusion antibody library from rabbit spleen (<u>ARM Technology</u>).
Expression	Overexpression vector and transfection into 293H cell line.
Reactivity	Human
Purification	Protein A
Isotype	lgG
Quality Control Testing	Antibody reactive against human BLNK peptide by ELISA and mammalian transfected lysate by We stern Blot.
Storage Buffer	In 1x PBS, pH 7.4
Storage Instruction	Store at -20°C or lower. Aliquot to avoid repeated freezing and thawing.
Deliverable	Up to three rabbit lgG clones of 100 ug each will be delivered to customer.
Note	 Customer may provide cell or tissue lysate for antibody screening. Rabbit monoclonal antibody generated by ARM technology is amenable to antibody engineering in cluding F(ab)₂, lgG, scFv and different Fc and non-Fc conjugates per customer request.

Applications

Western Blot (Transfected lysate)

Protocol Download

ELISA

Gene Info — BLNK	
Entrez GenelD	<u>29760</u>
GeneBank Accession#	<u>BLNK</u>
Gene Name	BLNK
Gene Alias	BASH, BLNK-S, LY57, MGC111051, SLP-65, SLP65
Gene Description	B-cell linker
Omim ID	604515
Gene Ontology	<u>Hyperlink</u>
Gene Summary	This gene encodes a cytoplasmic linker or adaptor protein that plays a critical role in B cell develo pment. This protein bridges B cell receptor-associated kinase activation with downstream signaling pathways, thereby affecting various biological functions. The phosphorylation of five tyrosine residues is necessary for this protein to nucleate distinct signaling effectors following B cell receptor activation. Mutations in this gene cause hypoglobulinemia and absent B cells, a disease in which the proto pre-B-cell transition is developmentally blocked. Deficiency in this protein has also been shown in some cases of pre-B acute lymphoblastic leukemia. Alternatively spliced transcript variants encoding different isoforms have been found for this gene. [provided by RefSeq
Other Designations	B cell linker protein B-cell adapter containing a SH2 domain protein B-cell adapter containing a Sr c homology 2 domain protein OTTHUMP00000020167 Src homology 2 domain-containing leukoc yte protein of 65 kDa

Pathway

- B cell receptor signaling pathway
- Primary immunodeficiency

Disease

- Alzheimer Disease
- Genetic Predisposition to Disease
- Tobacco Use Disorder
