Gene Name IER5

Gene Alias MGC102760, SBB48

Gene Description immediate early response 5

Omim ID [607177](#)

Gene Ontology [Hyperlink](#)

Gene Summary This gene encodes a protein that is similar to other immediate early response proteins. In the mouse, a similar gene may play an important role in mediating the cellular response to mitogenic signals. Studies in rats found the expression of a similar gene to be increased after waking and sleep deprivation. [provided by RefSeq]
