

GHRL monoclonal antibody (M03), clone 3C9

Catalog # H00051738-M03

Size 100 ug

Applications

Sandwich ELISA (Recombinant protein)

Detection limit for recombinant GST tagged GHRL is approximately 0.3ng/ml as a capture antibody.

Western Blot detection against Immunogen (38.61 KDa) .

Specification

Product Description

Mouse monoclonal antibody raised against a full length recombinant GHRL.

Immunogen

GHRL (AAH25791.1, 1 a.a. ~ 117 a.a) full-length recombinant protein with GST tag. MW of the GST tag alone is 26 KDa.

Sequence

MPSPGTVCSLLLLGMLWLDLAMAGSSFLSPEHQRVQQRKESKKPPAKLQPRALAGWLRPEDG
GQAEGAEDEMEVRFNAPFDVGIKLSGVQYQQHSQALGKFLQDILWEEAKEAPADK

Host

Mouse

Reactivity

Human

Interspecies Antigen Sequence	Mouse (82); Rat (82)
Isotype	IgG2a Kappa
Quality Control Testing	Antibody Reactive Against Recombinant Protein. Western Blot detection against Immunogen (38.61 KDa) .
Storage Buffer	In 1x PBS, pH 7.4
Storage Instruction	Store at -20°C or lower. Aliquot to avoid repeated freezing and thawing.

Applications

- Western Blot (Recombinant protein)

- ELISA

Gene Info — GHRL

Entrez GeneID	51738
GeneBank Accession#	BC025791
Protein Accession#	AAH25791.1
Gene Name	GHRL
Gene Alias	MTLRP, obestatin
Gene Description	ghrelin/obestatin prepropeptide
Omim ID	601665 605353
Gene Ontology	Hyperlink

Gene Summary

This gene encodes ghrelin-obestatin preproprotein, which generates ghrelin and obestatin. Ghrelin is an endogenous ligand for the growth hormone secretagogue receptor and is involved in regulating growth hormone release. Obestatin was initially reported to be an endogenous ligand for the orphan G protein-coupled receptor GPR39 and was involved in satiety and decreased food intake; however, these findings are controversial. Recent reports show that obestatin is involved in inhibiting thirst and anxiety, improving memory, regulating sleep, affecting cell proliferation, and increasing the secretion of pancreatic juice enzymes. Alternative promoters and alternative splicing result in multiple transcript variants, some of which encode different protein isoforms and some of which do not encode a protein but may regulate the ghrelin-obestatin preproprotein expression. In addition, antisense transcripts for this gene have been identified and may also function in regulation of the ghrelin-obestatin preproprotein expression. [provided by RefSeq]
