

AICDA rabbit monoclonal antibody

Catalog # H00057379-K

Size 100 ug x up to 3

Specification

Product Description	Rabbit monoclonal antibody raised against a human AICDA peptide using ARM Technology.
Immunogen	A synthetic peptide of human AICDA is used for rabbit immunization. Customer or Abnova will decide on the preferred peptide sequence.
Host	Rabbit
Library Construction	Non-fusion antibody library from rabbit spleen (ARM Technology).
Expression	Overexpression vector and transfection into 293H cell line.
Reactivity	Human
Purification	Protein A
Isotype	IgG
Quality Control Testing	Antibody reactive against human AICDA peptide by ELISA and mammalian transfected lysate by Western Blot.
Storage Buffer	In 1x PBS, pH 7.4
Storage Instruction	Store at -20°C or lower. Aliquot to avoid repeated freezing and thawing.
Deliverable	Up to three rabbit IgG clones of 100 ug each will be delivered to customer.
Note	1. Customer may provide cell or tissue lysate for antibody screening. 2. Rabbit monoclonal antibody generated by ARM technology is amenable to antibody engineering including F(ab) ₂ , IgG, scFv and different Fc and non-Fc conjugates per customer request.

Applications

- Western Blot (Transfected lysate)

[Protocol Download](#)

- ELISA

Gene Info — AICDA

Entrez GeneID	57379
GeneBank Accession#	AICDA
Gene Name	AICDA
Gene Alias	AID, ARP2, CDA2, HIGM2
Gene Description	activation-induced cytidine deaminase
Omim ID	605257 605258
Gene Ontology	Hyperlink
Gene Summary	This gene encodes a RNA-editing deaminase that is a member of the cytidine deaminase family. The protein is involved in somatic hypermutation, gene conversion, and class-switch recombination of immunoglobulin genes. Defects in this gene are the cause of autosomal recessive hyper-IgM immunodeficiency syndrome type 2 (HIGM2). [provided by RefSeq]
Other Designations	activation-induced deaminase integrated into Burkitt's lymphoma cell line Ramos
