Gene Description phosducin-like 3

Omim ID [611678](#)

Gene Ontology [Hyperlink](#)

Gene Summary This gene encodes a member of the phosducin-like protein family and is a putative modulator of heterotrimeric G proteins. The protein shares extensive amino acid sequence homology with phosducin. Members of the phosducin-like protein family have been shown to bind to the beta-gamma subunits of G proteins.
